

Chord Shapes 1: Basic Scales and Triads:(Bb)

(Foundational Knowledge. Apply to all 12 keys)

JimO

1. Start with a **Bb** major scale. The basic "Major" scale in Western Music uses this note grouping.

Root/Tonic Whole Step
Root - 2 - Whole - Half - Whole - Whole - Whole Half

2. Build Major and Minor 3rds on each note of the scale to create 3-Part **Tertial Chords**. These are the **Diatonic major, minor and diminished triads/chords** for the key.

5

1 2m 3m 4 5 6m 7dim 1

Imaj iim iim IVmaj Vmaj vim viidim IMaj

3. EXERCISES: Play the following with **broken chords** in 2 time signatures.

9

1 2 3 4 5 6 7 1/8

NAME _____

CHORDS: _____

13

Name: _____

4. These shapes are called **Arpeggios**.

17

Name: _____ etc.

5. NEW CONCEPT: Each chord has it's own **CHORD-SCALE**. They all have different **NAMES**.

21

1=IONIAN (Major) 2=DORIAN (Minor nat.6)

(Play through each scale. Notice how well they "fit" the chords.)

25

3=PHRYGIAN (Minor b2) 4=LYDIAN (Major#4)

29

5=MIXOLYDIAN (Majorb7) 6=AEOLIAN (Nat.minor)*

33

7=LOCRIAN (Minorb2andb5) 8/1=IONIAN (Major)

6. These scales contain **CHORD-TONES (Passive)** and **NON-CHORD TONES (Active)**.

37

Musical notation for exercise 6, showing a scale in G minor (one flat) with fingerings 1, 3, 5, 2, 4, 6, 7. The scale is written in treble clef with a key signature of one flat. The bass clef has rests.

7. **Chord-Tones** often begin melodies or stop at "rest points". See below.

41

Musical notation for exercise 7, showing a scale in G minor (one flat) with chord tones (CT) and non-chord tones (NCT) labeled. The scale is written in treble clef with a key signature of one flat. The bass clef has rests. The time signature is 3/4.

8. **Non-Chord-Tones** create tensions and energy to melodies. See Below.

45

Musical notation for exercise 8, showing a melody in G minor (one flat) with chords B \flat , Gm, E \flat , and B \flat /D. The melody is written in treble clef with a key signature of one flat and a time signature of 3/4. The bass clef has chords. Chord tones (CT) and non-chord tones (NCT) are labeled.

9. The general category here is **CHORD-SCALE-AGREEMENT**. When harmonizing melodies we try to find chords that "fit" the melody. Chord-Tones totally "agree", for the most part. The Non-Chord-Tones will normally "lead" to Chord-Tones by creating tensions like the ones shown above. **Now, try to fit some chords to this melody.**

49

Musical notation for exercise 9, showing a melody in G minor (one flat) with a time signature of 4/4. The melody is written in treble clef. The bass clef has rests.

* Natural minor can also be called "relative" minor or simply, Aeolian mode.
