

B7 Chord Guitar Finger Position

Let's start with how to place your fingers for the B7 chord. This is in the open position. Which are the chords you learn first when playing the guitar. Look at the B7 chord diagram.

B7 chord

- Place your first finger on the 4th string at the 1st fret. The D string.
- Next place your second finger on the 5th string at the second fret. (A string).
- Your third finger is on the 3rd string at the 2nd fret. (G string).
- Then your Pinkie is on the 1st string at the second fret. (E string).
- Strum the first 5 strings only.

Tip Number one: If you find it difficult to place your four fingers on the strings. You can play it without using your pinkie. If you don't fret the 1st string, then don't play the first string. Just play strings 5 4 3 2. If you need help reading chord diagrams take a look at [how to read a chord chart](#).
