Inversion Studies: 2:C,F,G ("Seeing" inversion shapes/grips for I-vi-ii-V7 chords)

JimO

1. Major Key Seventh-Chords--root position--On the Diatonic Scale. Key: C Major

<u>Performance Tip:</u> SEE the Chord Structure (above)l--THINK the inversion.

NOW: Take this pattern and work it out for more keys. Start with the keys of Bb and D and go through the circle-of-fifths. Ultimate GOAL here is to learn ALL the seventh-chords in the Western tonal system. The 7 chords per key with inversions adds up to 337 chord "shapes." That's quite a few--right?!! Best advice to digest this material: as stated below, SEE the chord and THINK the inversion.
